Art Unit: 1714

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hermann et al, US Patent No. 6,332,943.

Hermann et al discloses all of the claimed components of applicant's presently claimed invention. This includes dispersed colorant, dispersant, polytetrahydrofuran, solvent, water and binder. The components are also employed in weight percentages which directly overlap those of applicant's claims. No patentable difference is readily ascertained. For specific disclosures of the species of dispersants employed, see col. 4, lines 4-38, col. 6, line 58 through col. 7, line 45, col. 8, lines 5 through 67 and col. 10, line 44.
